

A3TEC MACHINE

The Four Corners' Hydraulic Repair Specialists

AZTEC

MACHINE & REPAIR

Specializing in hydraulic and industrial repairs.

All hydraulic repairs guaranteed when rebuilt to OEM specifications!

- Hydraulic cylinder repair and testing
- Hydraulic pumps, motors and valves repaired and tested
- Hydraulic hose fabrication
- Full line of chrome shafting
- Seals and seal kits
- Complete machine shop service
- Fabrication and welding

Aztec Machine specializes in hydraulic repair, with each repair guaranteed. We offer complete machining and fabrication for industry, oil and gas, and mining applications.

Hydraulic Components and Accessories

A full selection of fittings, couplers, adapters, protectors and hoses.

Hydraulic Cylinder Repair

Testing up to 3600 psi on extension and retraction. Full disassembly, evaluation, repair, assembly and testing of hydraulic cylinders. All cylinder repairs are guaranteed when rebuilt to OEM specifications.

We can repair damaged components and update older components as necessary, including:

- New rods
- Glands
- Pistons
- Barrels
- Eyelets
- Pins

Chrome Shafting: We stock a full line of chrome shafting from $\frac{3}{4}$ " to $3\frac{1}{2}$ " diameter, in $\frac{1}{4}$ " increments, as well as a limited number of $\frac{1}{8}$ " sizes. Metric sizes also in stock. We can certainly order any item not in stock.

Seals: We stock a large selection of 70 and 90 Durometer O-rings, along with a variety of common seals. We can order full seal kits for most OEM machines and components. Custom made seals for a variety of applications and environments are available.

Repair of Hydraulic Pumps, Motors and Valves

Complete rebuilding and testing of hydraulic pumps, motors, and valves.

Machined Products

- Pins
- Tail rolls
